

Milan Stanković.

AI Builder & Frontend Engineer · Vue · React · TypeScript · Automation

mln6stankovic@gmail.com · +381 65 317 8640 · Belgrade, Serbia · [LinkedIn](#) · [GitHub](#) · [Portfolio](#) · [Medium](#)

01 PROFILE

AI builder and frontend engineer with 4+ years in Vue, React and TypeScript, passionate about building clean, scalable, and high-performance web applications. Strong understanding of modern frontend frameworks, component-based architecture, and UI/UX best practices. Designs and operates multi-agent AI workflows end to end: supervised coding agents, validation gates, and unattended pipelines that have built 210 production sites.

02 EXPERIENCE

AI Builder & Automation Engineer

Jul 2026 - Present

Independent · Potpis Studio · Belgrade (remote)

STACK Astro, Node, TypeScript, Cloudflare Workers / Pages / D1 / R2, Playwright

- ▶ Built a pipeline that turns a Google Maps listing into a live website - scout, audit, generate, deploy: 210 sites across 14 verticals, 177 live, no two alike. It runs itself overnight: 80+ sites over 15 nightly runs, best night 9 of 9, each verified live. Potpis Studio is the inbound brand on it.
- ▶ Truthfulness gates on every outreach claim (one audit caught 78 of 161 unverified) and validation gates before any merge, run by a supervised fleet of agents.

Frontend Engineer

Jun 2025 - Present

LotusFlare (Ericsson-backed) · DNO Cloud Portal

STACK Vue 3, TypeScript, Pinia, Vite, Tailwind, Docker, Kubernetes

- ▶ Architected the team's AI engineering stack - cross-IDE agent rules, CLAUDE.md context system, and custom skills, open-sourced as [claude-setup](#).
- ▶ Own the UIs that let analysts configure data pipelines, reporting and real-time event processing for operators serving millions of subscribers.
- ▶ Cut portal initial load time 80% (1.2 min → 14 s) via dynamic imports, route-level splitting and Vite tuning.
- ▶ Led the Vue 3 Composition API + Pinia migration, and refactored a 2k+ line editor into a step-based flow: 45% less complexity, zero regressions.

Junior Frontend Engineer, then Frontend Engineer

Apr 2024 - Jun 2025

DEVersity

PointOne - Data Analysis Platform

STACK Nx Monorepo, React, TypeScript, Tailwind, Redux Toolkit → TanStack Query, TanStack Table, Recharts

- ▶ Built the analytics dashboard and a DataTable with filter, sort, inline edit and selection; drove the Redux Toolkit to TanStack Query migration and cut build time 40% and the main bundle 53%.

Aktivizam - Social Platform

STACK React, Next.js, TypeScript, Tailwind, Shadcn, React Hook Form, Vercel

- ▶ Built the core UI (layout, feed, filters, forms, tags, event calendar) and admin tools, and led the i18n rollout to English-speaking users.

Frontend Developer (intern), then Junior Frontend Engineer

Apr 2023 - Mar 2024

Connect The Dots · AI relationship intelligence platform

STACK Vue, TypeScript, Tailwind, TanStack Query, Pinia, Storybook, Vitest, Vite

- ▶ Refactored the legacy Vue UI, modernized the frontend architecture, and built reusable components - Table, Input, Accordion, Checkbox - pixel-matched to Figma.

03 PROJECTS

GameScore - [gamescore.cards](#)

Solo Project

- ▶ Production PWA for board game score-tracking: no account and no server, 20 curated templates, sharable Victory Cards, paid Pro tier. Built solo with Claude Code. Nuxt 4, TypeScript, Pinia, Dexie/IndexedDB, Lemon Squeezy, Vercel

SiteScore - [sitescore.pages.dev](#)

Solo Project

- ▶ On-page SEO auditor on Cloudflare's edge: 25+ checks across 7 analyzers plus PageSpeed Insights, shareable reports, embeddable agency widget. Nuxt, Workers, D1, KV, R2

04 SKILLS

AI & AUTOMATION

AI agents, LLM tooling, agentic workflows, web scraping, technical SEO, JSON-LD

LANGUAGES

TypeScript, JavaScript, HTML5, CSS3, SQL

FRAMEWORKS & UI

Vue 3, React, Next.js, Nuxt, Astro, Node.js · Tailwind, Shadcn · Pinia, Vuex, TanStack Query

TOOLING & INFRA

Cloudflare Workers / Pages / D1 / R2 · Vite, Playwright, Vitest, Docker, Vercel, Git

05 EDUCATION

B.Sc. Systems Engineering · University of Belgrade, ETF · GPA 8.75 / 10

2018 - 2022

Mathematical Grammar School · Belgrade · GPA 4.7 / 5 · 2014 - 2018
